Genotype	Forward Primer	Reverse Primer	Amplicon size (bp)
PreCre	CSD-neoF	CSD-Sigmar1-R	663
PostCre	CSD-lacF	CSD-Sigmar1-R	614
Wildtype	CSD-Sigmar1-F	CSD-Sigmar1-R	2403
PostFlp	CSD-Sigmar1-F	CSD-Sigmar1-R	899

Please note, these primers are auto-designed and may not have been verified by the repository, and as such may require optimization or redesign by your facility.

We recommend running primers singleplex. For screening of pups prior to any Flp or Cre recombination, the PreCre primers may be used to identify the mutant mice. The PostCre primers should be used if mutant mice were crossed with a Cre recombinase line. The PostFlp primers should be used if mutant mice were crossed with a Flp recombinase line. The wildtype primers should be used for zygosity testing of all mutant mice (pre or post recombination).
