Comments on protocol:

- May decrease Elongation time for shorter PCR fragments per manufacturer's suggestion, i.e. 1 minute/kb of sequence.

Strategy:

3 and 4 (3')		Targeted

Note: the gene specific primers in this protocol have been provided by Wellcome Trust Sanger Institute. Expected band size not provided.

****Targeting confirmation at the 5' end may not have been successful with these primers; primers will be redesigned if genetic analysis is requested with the associated clones. Please contact mmrrc@ucdavis.edu if you have questions or concerns.**
