Genotype Forward Primer Reverse Primer Amplicon size (bp)

PreCre	Reg-NeoF	Reg-Lrrc26-R	399
PostCre	Reg-LacF	Reg-Lrrc26-R	599
Wildtype	Reg-Lrrc26-wtFv2	Reg-Lrrc26-wtRv2	230

Please note, these primers are auto-designed and may not have been verified by the repository, and as such may require optimization or redesign by your facility.

We recommend running primers singleplex. For screening of pups prior to any Cre recombination, the PreCre primers may be used to identify the mutant mice. The PostCre primers should be used if mutant mice were crossed with a Cre recombinase line. The wildtype primers should be used for zygosity testing of all mutant mice (pre or post recombination).
